

Vidyo for Curriculum Enhancement

What are Your Needs?

- Is your fieldtrip budget shrinking or non-existent?
- Are you struggling to reach all students and help them to be fully engaged in learning?
- Do you have students who have never travelled beyond their communities, towns, or state? Would they benefit from exposure to new places/ people?
- Do you want to ensure that your student connect the classroom experience to life beyond the classroom?

Today's students benefit from classroom experiences rich in supplemental activities, bringing course material to life, engaging the learner more fully and inspiring a love of learning. Video technology opens opportunities for fieldtrips and extra-curricular activities that were previously limited by scheduling, travel and budget constraints.

At Issue

The need to enhance the learning experience with virtual classrooms and fieldtrips that expand students' horizons while meeting government educational requirements.

The need to expose remote and/or disadvantaged students with learning experiences that provide the cultural reference points to understand certain material

The need to engage all students and expose them to the real-world applications of classroom material

The Vidyo Solution

Use Vidyo to connect students to content providers that make subject matter more relevant and engaging. For example, students can learn about dinosaurs by visiting with working paleontologists; or join a chat session with a published author or filmmaker. Students can also meet face to face with teachers and students from other schools, creating rich content and sharing their work via Vidyo.

Vidyo can deliver education experiences to students who would not otherwise have the opportunity for travel to or interactive experiences with culturally or historically significant locations around the world. With Vidyo there's no need for special-purpose hardware, rooms or networks. Virtual learning environments can be established with everyday desktop or mobile devices, education carts, and an Internet connection.

Many virtual fieldtrips allow students to interact directly with experts in the field to learn more about their careers and, more importantly, the educational steps necessary to pursue those careers in the future. This type of interaction helps students envision a personal roadmap for success. Students could even take this a step further and use Vidyo to create mentoring relationships with professionals in their chosen field.
